

HEALTHCARE

Here at Business Connection Services Inc., we understand that physician practices have a growing need for specialized services. The health care industry has experienced a great deal of change in recent years. These changes have created serious issues for many physician practices. Physicians must focus on increasing revenue while containing costs. We strive to help our clients achieve these goals so they can focus on practicing medicine.

While our office can prepare financial statements and tax returns for medical practices, we know that we must provide more value-added services to guide physician practices through industry changes. We offer assistance in the following areas:

- bookkeeping
- business office organization
- practice planning
- practice valuations
- financial planning
- employee benefits
- human resources
- information technology (IT) services
- customer service training
- business etiquette training

Our relationships are built on trust and integrity. We take the necessary time to understand your goals so that we can efficiently provide high quality, timely service. As you grow, we have the services to help you reach your goals.
